THE ROLE OF SOFTWARE DEVELOPMENT IN L&D

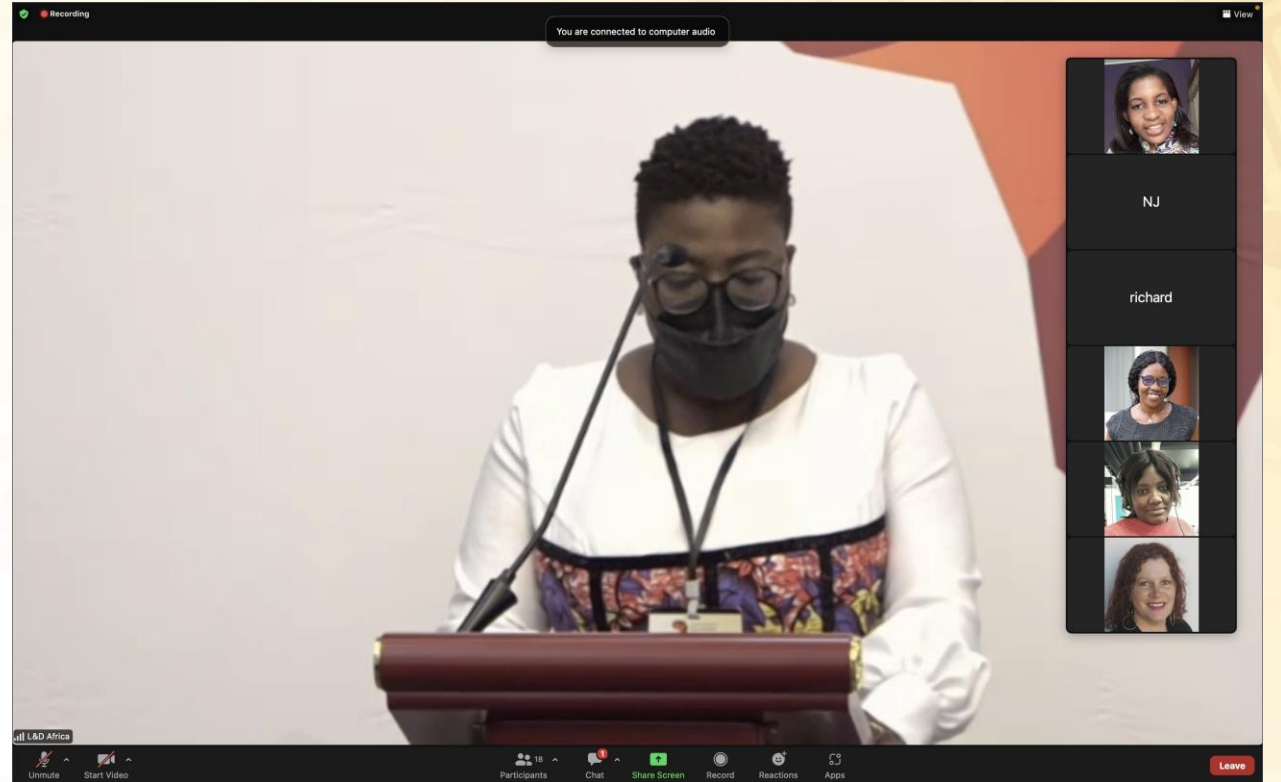

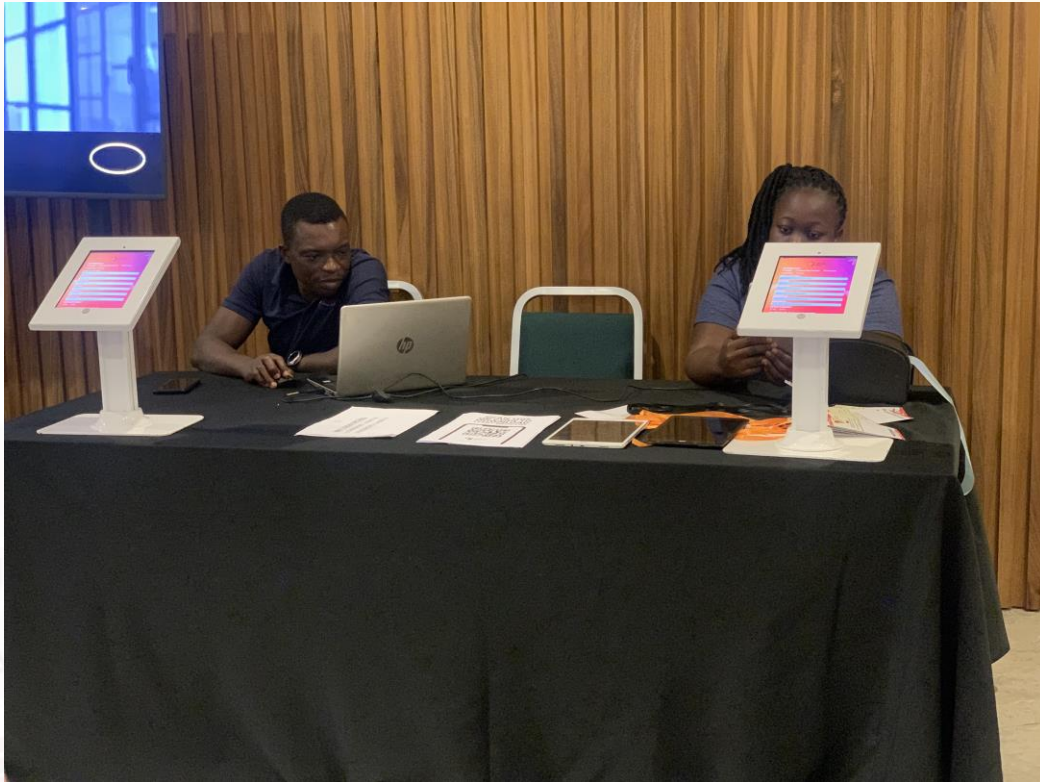

KOFI OFORI-AMANFO

“If I had to say what is the thing that I feel best about, it's being involved in this whole software revolution and what comes out of that, because you can go all over the world and go into schools and see these computers being used and go into hospitals and see them being used, and see how they're tools for sharing information that hopefully leads to more peaceful conditions, and just the great research advances that come out of that”

Bill Gates

- Technology has become a part of our everyday lives.
- Software has played a very key role in that.
- Technology is present in every industry.

Role of Software Development in L&D

- Personalized & Flexible Learning
- Learner Engagement
- Diversity & Inclusion
- Talent Acquisition
- Artificial Intelligence
- Microlearning
- Career GPS
- Upskilling & Reskilling
- Analytics

Conclusion

- Technology is your friend 😊
- Software enhances the possibilities of L&D
- Upskilling and Reskilling is essential to stay relevant
- Microlearning
- Learning Analytics for Monitoring and Evaluation
